chair/lounger/stool

design philosophy

Simple and very comfortable, the Vivid chair's paired down shape is highlighted by its tight upholstery, cleverly held deeply into the bucketed seat. Vivid was motivated by quality and function and the range of chair, barstool, and lounge chair are a welcome addition to any space, especially as their fully upholstered form can be easily altered with a change of fabrics.

technical specification

The main seat area of Vivid is constructed with a 3D formed plywood, providing a comfortable bucketed seat. This is then covered with CMHR foams. The base options are both made from mild steel then polyester powder coated or chromed.
