Design

Softbox is an upholstered storage unit. Particularly useful in workplaces but also with applications in retail environments, hospitality and education.

The top finishes are designed to work perfectly with other naughtone products and offer a useable 'standard' palette to contrast the ultimately flexible appearance of the upholstered side panels. Standard top options are oak veneer, walnut veneer, white MFMDf and forbo lino. As with all upholstered products we offer a wide variety of fabrics already 'graded-in' to our pricing additional to working with customer specified fabrics.

Softbox has smooth running sliding doors for uncluttered access and is offered in a number of standard sizes ranging from traditional sideboard and credenza proportions to taller units that can be used to divide space.

Softbox is a perfect opportunity to bring more character, warmth and sound dampening into a space with a type of product that is often considered a utility item.

Technical

Softbox has an internal carcass of white MFMDf. The top and base panels have various finish options on an MDF core. The side panels, rear panel and doors are fully upholstered, all of which can be easily removed and replaced if necessary. The doors are mounted to quality sliding door mechanisms. Softbox sits on black stained wooden feet, set back from the edges of the unit, giving a 'floating' appearance.
